

AWARD CATEGORIES

Digital Innovation / Transformation Awards

These categories recognise game-changing innovation/transformation initiatives by solution partners. The initiative submitted must have created outstanding impact on the way businesses operate and services are offered, or greatly enhanced the end users' experience. It should have fulfilled a marketplace need by developing a commercially viable business model, which has the potential to be sustainable in the long run. It may also have carved out new markets with high growth potential for itself, through this innovative/transformational initiative.

Digital Innovation

Digital Transformation

Solution Awards

The following categories recognise solution partners that have successfully implemented products or solutions leveraging modern technologies/methodologies to deliver tangible business impacts. Solutions could have been deployed jointly with companies to digitally transform their businesses, resulting in greater competitive advantage, operational efficiency, enhanced productivity and improved customer experiences.
